

# [Software installation for gcc & gdb]

1. Download Cygwin installer from <https://www.cygwin.com/install.html>
2. Run the .exe, choose path etc. Note that while choosing path there should be no space for the root directory path.

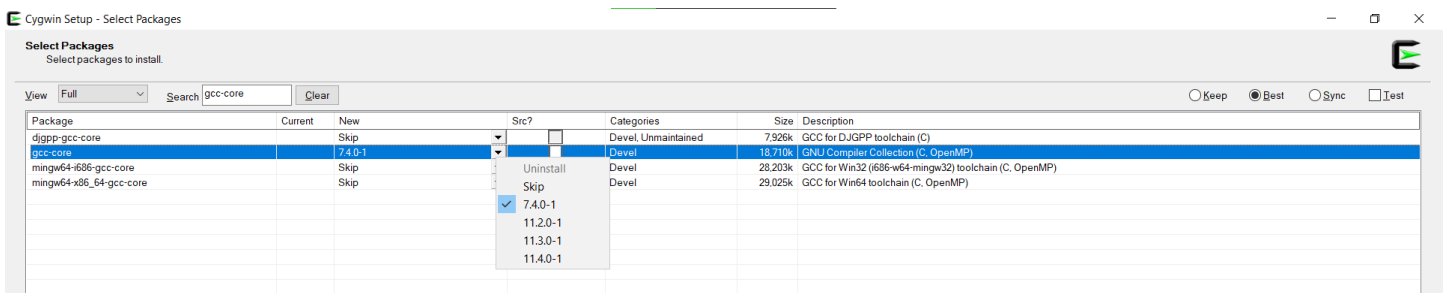

3. After Configuring all the paths, there will be new popup (snip below):

4. Make View as “Full” from the drop-down menu.

5. Select:

- a) gcc-core in the search menu & make sure in the “new column” it indicates a version like below (it does not show the bin directory)

- b) Search gdb & make sure in the “new column” it indicates a version like below (it does not show the bin directory)

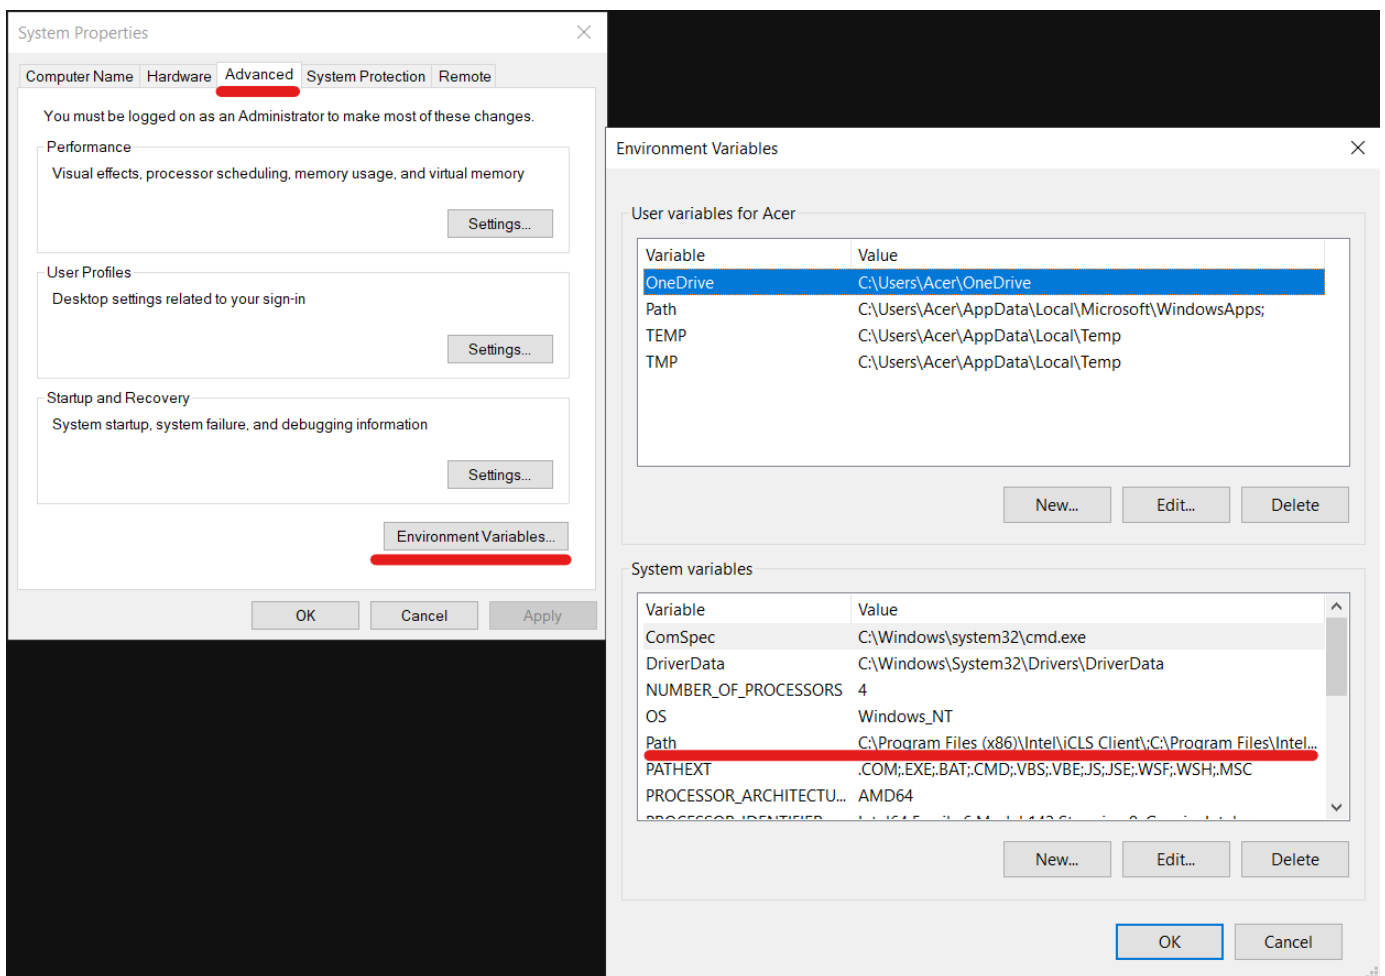

Continue...

c) Search make & make sure in the “new column” it indicates a version like below (it does not show the bin directory)

libpagemaker0.0-doc	Skip	Libs. Unmaintained	109k	Adobe PageMaker import filter library (API documentation)
libpagemaker0.0_0	Skip	Libs. Unmaintained	65k	Adobe PageMaker import filter library (runtime)
make	4.4.1-1	Devel	55k	The GNU version of the make utility
make-debuginfo	Skip	Debug	491k	Debug info for make
make-depend	Skip	Devel	30k	X Makefile dependency tool
make-depend-debuginfo	Skip	Debug	61k	Debug info for make-depend
makepasswd	Skip	Perl. Utils	14k	Generate and encrypt passwords
makeself	Skip	Archive	27k	Utility to generate self-extractable archives
mingw64-686-libpagemaker0.0	Skip	Libs. Unmaintained	76k	Adobe PageMaker import filter library for Win32 toolchain
mingw64-686-gtk-omake	Skip	Devel. Unmaintained	7.326k	GTK development tools for Win32 toolchain

- Now all the packages required are selected, by clicking Next, we can check if the installation has been finished.
- After all installation has been finished go to Cygwin installed directory i.e., something like C:\\*\*\*\cygwin64\bin & copy this path.
- Go to Control Panel\System and Security\System & click on Advanced system settings.
- After opening go to the advanced tab & click on environment variables

- Choose path & click on edit (All under system variables window)
- Click on new & add the path in that space & click OK to confirm.
- Once all done, now we can verify if this works from CMD.
